INTRODUCTION

Management Fees can be processed in a global process across multiple developments at the one time.

They must have already been set up on the property itself to be able to be processed. The value entered on each property should be the annual net amount for that individual property. When processing your Management Fees, CPL will divide this annual net amount by the appropriate charge period and add the VAT before adding this directly to the client charge file.

LOCATING THE MANAGEMENT FEES TOOL

To get started with this, select the main Clients tab in CPL.

When the **Clients** window opens click on the **Global** icon in the **Action Panel** towards the bottom of the screen.

This will open the Client Global Actions window.

Locate the Management Fees tab and click to select this.

There is an option on the right of the screen to enable you to process only the management fees for sold clients. This would allow you to have these fees added to the sold clients' accounts ahead of when you would normally process the management fees for the developments on an individual charge date code. After processing the fees, this would then set these clients to be excluded from having fees applied to them when running your general management fees process.

Make sure you leave this unticked if you wish to process fees for all clients in a development or charge date code.

Set your Charge Date Code to the correct one for the Management Fees you wish to process.

Otherwise, if not selected, the process will pick up all properties in the development or developments selected.

There is an option to select to run management fees for a single office if you have offices set up in CPL.

When you have made all relevant selections, you have the option to run a **Print Prelist** before processing your fees.

This will display in a new window as a report of the Management Fees which will be run based on the selections you have made from the available parameters. You can print and save this report if you wish. Close the report when you are ready to proceed with processing your fees.

When you are ready to process your fees, click on the Process Fees icon.

CPL will confirm how many properties it is about to process fees for. Click on **No** to return to your fields to set a different configuration if this is not correct or click on **Yes** to move forward and process your fees.

CPL will display a progress bar as it works its way through the properties.

| (50%) |

| |

It will display an information confirmation when it has completed the process.

You can click on **OK** to dismiss this confirmation.

Management Fees will have been processed for the clients in the relevant properties directly to the **Charge Transaction** file, waiting to be picked up when an invoice run is processed.
